## MESSAGE

It is matter of pride to pen down the message for your school magazine for the session 2019-20.

A school magazine helps record the curricular and extracurricular activities of the school and provides an opportunity to the students to share their creativities and thoughts with fellow students. A student feels joy and pride when he sees that his article has appeared in print and it encourages him to write more and also inspires others to follow him. It encourages students to think and write. They also develop their power of thinking and strengthen their imaginations.

I wish success to all the staff members in its endeavors.

**Jai Hind**
